DETAILED ACTION

Allowable Subject Matter

1. Claims 1 – 3, 9 – 12, and 22 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in a combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1 and 22, for example, which include, a lens having a first with a channel around a peripheral edge of the lens and a second face with a projection around the peripheral edge of the lens and at least two lenses are stacked each other and the projection of the second face of a first lens engages the channel of the first face of a second lens and preventing movement between lenses.
3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The closest reference as follows:

Spinali (6,574,053 B1) discloses a kinematic alignment structure for placement between components axially aligned in a cylindrical body.

Osterried (6,445,516 B2) discloses a lens system in particular projection lens system in a semiconductor lithography.

Hatasawa et al (5,852,518) discloses a projection optical unit and projection exposure apparatus comprising the same.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
